

FOR IMMEDIATE RELEASE

AERC.com, Inc. Offers Additional Solutions for Small Business Owners Through the Expansion of the RecycleKit Program

Flanders, NJ – February 1, 2010 – AERC.com, Inc. (AERC Recycling Solutions) has expanded its RecycleKits Program to include a Recycle Kit for 6' Tanning Bulbs. Each Tanning Bulb RecycleKit holds twenty five 6' (t12) bulbs. The packaging used to collect and ship these bulbs is consistent with packaging improvements made to the 8' Fluorescent Bulb RecycleKit. Packaging utilized for 4', 6' and 8' Fluorescent Bulb RecycleKits employs lined, double boxed protection. This minimizes bulb breakage and, therefore, the hazards of broken glass and loose phosphorous powder while RecycleKits are filled at the client's site as well as in transit.

AERC's RecycleKits Program offers a cost effective, safe, reliable and compliant solution for any individual or business who wishes to responsibly dispose of their Electronic or Universal Waste materials. This program is of particular interest to smaller producers of these types of wastes or those who do not have an AERC facility in close proximity to them. The fee for each RecycleKit includes all costs of participating in the program, including shipping and processing of materials as well as a Certificate of Recycling (COR). Certificates of Destruction (COD) are available for any data storage devices sent through our Electronic Scrap or Cell Phone RecycleKits. CODs and CORs are available upon request.

RecycleKits offered by AERC Recycling Solutions provide a cost effective and responsible method of disposition for lamps, batteries, non-PCB ballasts, mercury-containing devices, dental amalgam, electronic scrap and cell phones. Lamps accepted in the RecycleKits Program include fluorescent, shattershield, tanning, ultraviolet, HID, CFL, UTube, circular, incandescent, and halogen. AERC does accept PCB ballasts through other delivery methods. RecycleKits may be purchased by placing an order online at www.RecycleKit.com, calling AERC toll free at 866-447-5177 or sending an e-mail to info@RecycleKit.com. Businesses with larger quantities of materials for disposition should contact their local sales representative by calling the toll free number.

As part of AERC's continuous improvement business model, AERC monitors the marketplace for the need for additional waste management solutions. AERC's recent changes in the RecycleKit Program provide for improved solutions for current clients as well as an additional option for businesses needing to dispose of tanning bulbs. Currently, RecycleKits are utilized by small producers of Electronic and Universal Waste materials in the medical, healthcare, property management and educational industries. Through the addition of the 6' Tanning Bulb RecycleKit, tanning salons are also able participate in this cost effective and convenient program. The Company welcomes any suggestions you may have for expanding our current product line or improving our existing products and services.

About AERC Recycling Solutions

AERC Recycling Solutions is committed to a green world by helping clients in proper end-of-life management of assets, including those containing sensitive data and components hazardous to our environment. AERC has become an industry leader through its partnerships with clients by providing unmatched convenience, regulatory compliance and expert consulting to handle Electronic Waste issues. AERC is committed to responsible recycling practices for a healthier tomorrow.

3 Gold Mine Road, Flanders, NJ 07836 Office: 973.691.3200 Fax: 973.691.3233

"We are committed to a green world by helping clients in proper end-of-life management of assets containing sensitive data and components hazardous to our environment."

AERC maintains a Zero-Waste-to-Landfill Policy for all of its hazardous electronics/ electrical recycling services. All electronics are dismantled domestically by our highly trained staff. Any information on data storage devices is either wiped to the Department of Defense Standards or physically destroyed. AERC offers its clients compliance with Federal, State, and Local regulations and can provide an audit trail for compliance with data security and environmental laws. With its own fleet of GPS tracked trucks, the Company provides delivery confirmations and in-house management of logistics. The Company provides “chain of custody” of assets for clients with coverage throughout all major markets in the United States, with continued plans for expansion across the United States.
